

## Exercise 6.2

### MCMC Hierarchical Regression Example

*Instructions:* You may discuss this assignment with other students in the class, but you must submit your own answers to the questions below. Include an honor pledge with your submission. Submit online and in PDF. This exercise is ungraded.

1. Run the code for the therapeutic touch example of hierarchical regression and discuss your results both in terms of the assessment of therapeutic touch and in terms of convergence of the Markov chains.
